AquaMitra CSP – Activity Log Writing Guide

CSP period: 04-05-2026 to 27-06-2026 (8 weeks, Monday to Saturday)

Students: Kunasani Kraanthi (24481A05J7), Kanna Jagadish Babu (24481A05F4), Kodali Durga Mahesh (24481A05G7), Kodali Vijaya Babu (24481A05G8)

Copy this by hand into the Activity Log of your own record, one row per day. Change any line that does not match what you actually did.

Week 1: Community Familiarisation and Problem Identification (04-05-2026 to 09-05-2026)

Day 1 – 04-05-2026, Monday

Activity: Orientation on CSP objectives and discussion of the fishery-pond theme.

Learning outcome: Understood how a technical skill can serve a community need.

Day 2 – 05-05-2026, Tuesday

Activity: Studied what a Chepala Cheruvu (fish pond) is and the activities involved in running one.

Learning outcome: Learnt basic pond-management vocabulary.

Day 3 – 06-05-2026, Wednesday

Activity: Listed stakeholders: owners, managers, workers, suppliers, traders, officers.

Learning outcome: Learnt to map stakeholders and their information needs.

Day 4 – 07-05-2026, Thursday

Activity: Prepared open questions for the first interaction with pond owners.

Learning outcome: Practised framing neutral questions.

Day 5 – 08-05-2026, Friday

Activity: Interacted with community members about pond care and difficulties.

Learning outcome: Practised respectful listening and note-taking.

Day 6 – 09-05-2026, Saturday

Activity: Compiled notes into a summary of initial observations.

Learning outcome: Separated what was heard from what was assumed.

Week 2: Community Interaction and Survey Preparation (11-05-2026 to 16-05-2026)

Day 1 – 11-05-2026, Monday

Activity: Drafted survey topics: ponds, species, water checks, feeding, deaths, costs, sales.

Learning outcome: Learnt to derive survey topics from objectives.

Day 2 – 12-05-2026, Tuesday

Activity: Wrote questions and a voluntary-participation statement; prepared Telugu wording.

Learning outcome: Learnt questionnaire design and consent.

Day 3 – 13-05-2026, Wednesday

Activity: Tested the questionnaire on a few people and corrected unclear questions.

Learning outcome: Understood the value of pilot testing.

Day 4 – 14-05-2026, Thursday

Activity: Discussed how water is checked and feed quantity decided with pond managers.

Learning outcome: Saw the gap between guidance and practice.

Day 5 – 15-05-2026, Friday

Activity: Asked how stocking, feeding and deaths are recorded.

Learning outcome: Learnt how real records differ from ideal formats.

Day 6 – 16-05-2026, Saturday

Activity: Organised responses in a sheet and listed preliminary requirements.

Learning outcome: Turned raw responses into requirements.

Week 3: Analysis of Community Problems (18-05-2026 to 23-05-2026)

Day 1 – 18-05-2026, Monday

Activity: Grouped the reported challenges into six problem categories.

Learning outcome: Learnt to group qualitative data.

Day 2 – 19-05-2026, Tuesday

Activity: Analysed record-keeping needs for pH, temperature, dissolved oxygen and turbidity.

Learning outcome: Understood what each water parameter indicates.

Day 3 – 20-05-2026, Wednesday

Activity: Analysed stocking, weight sampling, biomass and feed calculation needs.

Learning outcome: Linked biomass with feed planning.

Day 4 – 21-05-2026, Thursday

Activity: Analysed mortality and pond-event recording requirements.

Learning outcome: Understood how event logs reveal patterns.

Day 5 – 22-05-2026, Friday

Activity: Reviewed expense, production and sales record needs per cycle.

Learning outcome: Understood simple cost-and-return accounting.

Day 6 – 23-05-2026, Saturday

Activity: Wrote the problem statement and checked it against the findings.

Learning outcome: Practised precise problem formulation.

Week 4: AquaMitra Requirements and Design (25-05-2026 to 30-05-2026)

Day 1 – 25-05-2026, Monday

Activity: Defined system objectives and scope from the project presentation.

Learning outcome: Learnt to state bounded objectives.

Day 2 – 26-05-2026, Tuesday

Activity: Identified users: pond owner, manager, helper and adviser.

Learning outcome: Learnt to write user roles and use cases.

Day 3 – 27-05-2026, Wednesday

Activity: Organised the modules: pond, water, growth, feed, mortality, alerts, finance, dashboard.

Learning outcome: Learnt modular decomposition.

Day 4 – 28-05-2026, Thursday

Activity: Drew the workflow: user, Streamlit, Python logic, database, dashboard.

Learning outcome: Learnt architecture and data-flow diagrams.

Day 5 – 29-05-2026, Friday

Activity: Sketched the dashboard and data-entry forms with Telugu labels in mind.

Learning outcome: Practised low-fidelity UI design.

Day 6 – 30-05-2026, Saturday

Activity: Reviewed usability needs: simple words, large controls, minimal typing.

Learning outcome: Understood inclusive design.

Week 5: Technical Mini-Project Development (01-06-2026 to 06-06-2026)

Day 1 – 01-06-2026, Monday

Activity: Studied Streamlit basics: widgets, forms, tables and charts.

Learning outcome: Learnt to build a web interface with Python.

Day 2 – 02-06-2026, Tuesday

Activity: Planned pond-record data fields and a draft database schema.

Learning outcome: Learnt entities, keys and relationships.

Day 3 – 03-06-2026, Wednesday

Activity: Designed water-quality and fish-growth record formats with dates and units.

Learning outcome: Learnt why units and timestamps matter.

Day 4 – 04-06-2026, Thursday

Activity: Documented biomass and feed formulas and worked a sample example.

Learning outcome: Applied and checked formulas by hand.

Day 5 – 05-06-2026, Friday

Activity: Planned the mortality and event log fields.

Learning outcome: Combined structured and free-text fields.

Day 6 – 06-06-2026, Saturday

Activity: Recorded the design status of each module.

Learning outcome: Reported status accurately.

Week 6: Financial Tracking and Risk Awareness (08-06-2026 to 13-06-2026)

Day 1 – 08-06-2026, Monday

Activity: Designed expense categories and sales record fields.

Learning outcome: Learnt to structure financial records by cycle.

Day 2 – 09-06-2026, Tuesday

Activity: Drafted formulas for total expenses, revenue and net return.

Learning outcome: Understood limits of simple accounting.

Day 3 – 10-06-2026, Wednesday

Activity: Described user-configured warning rules for water readings.

Learning outcome: Learnt why limits cannot be universal.

Day 4 – 11-06-2026, Thursday

Activity: Prepared sample management scenarios to test logic on paper.

Learning outcome: Practised scenario-based testing.

Day 5 – 12-06-2026, Friday

Activity: Listed input-validation rules: ranges, required fields, dates.

Learning outcome: Learnt that data quality needs design.

Day 6 – 13-06-2026, Saturday

Activity: Documented limitations and safety considerations.

Learning outcome: Learnt to communicate system limits.

Week 7: Review, Demonstration, and Community Awareness (15-06-2026 to 20-06-2026)

Day 1 – 15-06-2026, Monday

Activity: Prepared a handout on why and how to keep pond records.

Learning outcome: Learnt to explain technical ideas simply.

Day 2 – 16-06-2026, Tuesday

Activity: Planned the awareness session: audience, content and feedback form.

Learning outcome: Learnt outreach planning.

Day 3 – 17-06-2026, Wednesday

Activity: Explained record keeping and the AquaMitra workflow to community members.

Learning outcome: Practised public communication.

Day 4 – 18-06-2026, Thursday

Activity: Collected feedback through a short form and conversation.

Learning outcome: Learnt respectful feedback collection.

Day 5 – 19-06-2026, Friday

Activity: Listed usability improvements from the feedback.

Learning outcome: Converted feedback into change requests.

Day 6 – 20-06-2026, Saturday

Activity: Summarised recommendations from the awareness activity.

Learning outcome: Practised synthesis and reporting.

Week 8: Evaluation, Documentation, and Conclusions (22-06-2026 to 27-06-2026)

Day 1 – 22-06-2026, Monday

Activity: Organised logs, survey sheets, sketches and other records.

Learning outcome: Learnt evidence-based documentation.

Day 2 – 23-06-2026, Tuesday

Activity: Reviewed each requirement against the proposed AquaMitra modules.

Learning outcome: Learnt requirement traceability.

Day 3 – 24-06-2026, Wednesday

Activity: Documented limitations, assumptions and items needing expert advice.

Learning outcome: Learnt honest reporting.

Day 4 – 25-06-2026, Thursday

Activity: Summarised learning outcomes individually and as a team.

Learning outcome: Practised reflective evaluation.

Day 5 – 26-06-2026, Friday

Activity: Prepared recommendations for farmers, leaders, college and developers.

Learning outcome: Learnt to write actionable advice.

Day 6 – 27-06-2026, Saturday

Activity: Completed the report and reviewed it with the faculty guide.

Learning outcome: Practised academic report writing.
